

The Breakaway Calming Collar

(Just sharing an experience we had with the regular Sentry calming collar)

The Sentry calming collars work great & helps one of our foster cats, but one time (thankfully we were right there) as he was grooming it got caught on his bottom jaw & he couldn't get it off. After that we just didn't feel comfortable putting one back on him as they came packaged so we got right online to search for a "breakaway" calming collar, thinking surely one exists. To our disappointment we didn't find one (we even contacted Sentry to suggest they make one, but we feel our email fell on deaf ears). However, we did come across this site where someone custom made their own breakaway calming collar using the Sentry collar.....BRILLIANT!

<http://peridotsoul.com/calming-cat-collars/>

We went right out to get what we needed to make our own custom breakaway calming collar & now it's the only way we'll allow any cat to wear one. Hope this helps anyone finding themselves in the same boat!
